

Dryer Feeder

- More than capable of keeping up with today's faster dryer speeds of 20 feeds per minute.
- Heavy-duty design and construction provide years of continuous service with very low maintenance.
- Hydraulic activated.
- Synchronized to the dryer for smooth and consistent operation.
- Can be custom built for any veneer drying system.
- Floating-beam arrangement prevents jam-ups and provides easy side access for servicing and clearing problem pieces.
- Backed up by one of the industries finest reputations.
- Service and parts department.
- References available.
- Installation available.

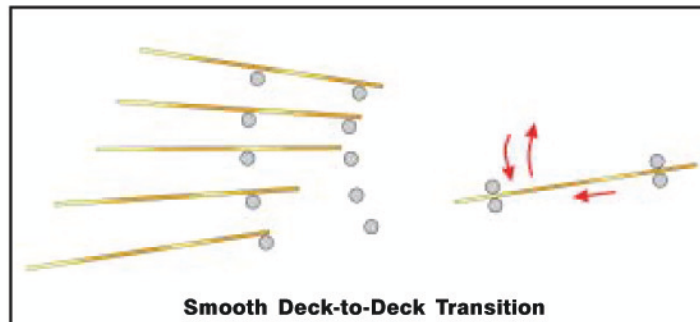

THE ULTIMATE DRYER INFEED

The Sweed Dryer Feeder provides systematic feeding of individual trays in the dryer. The feeder receives the top sheet of wet veneer from each of the 3 side-by-side stacks of veneer and uniformly distributes the veneer onto each individual deck of a multi-deck veneer dryer infeed. Adjustable "Duck Bills" guide veneer onto dryer infeed. This machine can be built to feed up to 8 decks. A long-lasting sturdy workhorse, this feeder is compatible with today's high-speed dryers and requires very little maintenance.

Veneer Dryer Infeed with Even Ender/Lappers

The Veneer Dryer Infeed section conveys wet end veneer from the veneer feeder to the dryer. For optimum efficiency, the infeed section can be supplied with Sweed's Even Ender/Lapper System. This system lifts the forward veneer sheet automatically to allow the trailing sheet to slide underneath and then lowers the forward sheet back onto the trailing sheet with an ideal overlap as the sheets proceed into the dryer.

Smooth Deck-to-Deck Transition

INCREASING DRYER PERFORMANCE FOR OVER 50 YEARS

Sweed Machinery manufactures a complete line of dryer support products. Each piece is designed with dryer efficiency in mind. With so many dryer configurations being used in the industry today, the benefit numbers vary. Give the experts at Sweed a call! With a quick review the Sweed panel experts can calculate the best solution to enhance your existing dryer system.
